

Professional

Summary: Graduate from the **University of Connecticut**, with specialized education and strong technical abilities in math and science; earned a Bachelors of Science Degree in **Physics** in May 2026. Professional, ready to demonstrate strong analytical skills, problem solving, and data imaging with a strong interest in **astronomy research**; a group leader and team player ready to step up to complex challenges by collaborating with others. Demonstrates ability to work independently while also cultivating strong relationships in the work environment; shows passion and dedication to completing assigned tasks.

RESEARCH EXPERIENCE:

Undergraduate Researcher , UConn Astronomy Department, July 2025 – May 2026

- Research regarding the correlation between star formation and molecular gas at ~100 pc resolution.
 - Utilize PHANGS-ALMA and PHANGS-MUSE data to study the Kennicutt–Schmidt star formation relation.
 - Perform data analysis using Bayesian linear regression fitting methodologies and Monte Carlo simulations
 - Mapped and visualized spatial distributions of total gas mass and star formation using python and DS9
-

WORK EXPERIENCE:

Project Assistant Tradebe Environmental Services, June 2023 – January 2024

- Worked with the Chief Scientist and plant managers on the PM-10 dust mitigation program at the Norlite facility.
- Assisted in diagnosing and resolving issues with the state-regulated dust monitoring system.
- Collaborated with sales staff to assess particle-size distributions of aggregate products.
- Supported inventory logging and analysis for essential machinery and plant operations.

Laboratory Assistant Tradebe Environmental Services, June 2025 – Present

- Gained extensive knowledge of plant operations and collaborated with the head lab chemist to test Chemical Oxygen Demand, Polychlorinated Biphenyls, and hazardous metals
- Determined whether certain materials were viable for processing through Gas Chromatography and Electron Capture Detection.

Shift Lead UConn Dining Services, Spring 2025 – Spring 2026

- Supervised student employees and delegated tasks during operating hours.
 - Ensured smooth dining hall operations and compliance with safety standards.
 - Maintained strong customer service and resolved issues efficiently.
-

EDUCATION:

Bachelor of Science in Physics • GPA: 3.25 University of Connecticut, Storrs; August 31st 2022 - May 15th 2026
